WHOLESALE TRADE LIST

OF THE

Morrisville Nurseries,

ESTABLISHED 1849.

SAMUEL C. MOON,

Bucks County, MORRISVILLE, Pa.

The Morrisville Nurseries are about one mile from Morrisville, a station on the New York Division of the P. R. R., about thirty miles from Philadelphia and sixty miles from New York, and about two miles from Trenton, New Jersey.

Through Freight Rates from Trenton to all principal cities north, south, east and west, via Pennsylvania or Lehigh Valley Railroads. Also, water transportation to Philadelphia and New York. All goods will be delivered to the railroad or steamboat in good condition, after which they are entirely at the risk of the purchaser.

All Claims for errors or deductions must be made immediately upon receipt of goods.

Terms Cash, unless by special agreement. We ship C. O. D., when cash does not accompany order. Make Postal Notes and Orders payable at Trenton, New Jersey.

Address all communications by mail or telegraph to

SAMUEL C. MOON,
Morrisville, Bucks County, Pa.

SPECIAL OFFERS.

SHRUBBERY COLLECTIONS.

I will give 1,000 Hardy Flowering Shrubs, well assorted in ten or fifteen varieties, my selection, good plants, from two to three feet, for $40. Or, 1,000 Shrubs of larger size, from three to five feet, first-class stock, assorted in ten to fifteen varieties, my selection, for $60.

LARGE PURPLE BEECH.

Recently transplanted and well rooted.

Purple Beech, 8 to 10 feet, 1¼ to 1¾ inch caliber, $75.00 per 100.

Purple Beech, 10 to 12 feet, 1¾ to 2 inch caliber, $100.00 per 100.

Ornamental Seedlings,—See list on page 5.

SAMUEL C. MOON'S WHOLESALE TRADE LIST.

THE BIG CHESTNUT. 60 NUTS MAKE ONE QUART. TREES PERFECTLY HARDY AND ENORMOUSLY PRODUCTIVE. COMMENCING TO BEAR IN FIVE YEARS.

NUMBO, THE BIG CHESTNUT.

"**Numbo**" is a very superior variety, which is perfectly hardy, enormously productive, a regular bearer; the nuts are of largest size and fine quality, ripening early, usually before frost. We believe there is no better variety of European Chestnut in this country.

	Per 10.	Per 100.

GLADIOLUS.

Gladiolus are one of my specialties. We have a very fine collection of named varieties, and my mixtures are acknowledged by those who have bloomed them to be an unusually fine strain.

They contain some of the finest named varieties and some very fine new seedlings.

When the selection of named varieties is left to me, I endeavor to give as much variety in shades as possible, and can generally make a more satisfactory selection for a given price than buyers who are not thoroughly acquainted with them are able to make for themselves.

	Per 100.	Per 1,000.
Price of named collection, from 10 to 20 varieties, my selection	$6 00	$50 00
Mixed, all colors	2 00	15 00
" " " light shades predominating	3 00	20 00
Mixed, mostly white or very light	5 00	30 00

Special lists of named sorts will be priced on application.

GLADIOLUS.

WELL-GROWN LARGE STOCK.

The Attention of Landscape Gardeners and Superintendents of Parks is particularly called to the following list of large stock. It is not overgrown brush-heap trash, but well-grown, handsome specimens that have been recently transplanted, and are in first-rate condition for immediate use in lawns or avenues:

ABIES Orientalis, Conica, Compacta, Inverta, Biota, Aurea and Elegantissima.

PICEA Nordmanniana and Pectinata; PINUS Strobus, Nanus and Cembra.

RETINOSPORA Plumosa, Plu. Aurea, Pisifera, Obtusa, Nana, Squarrosa and Lycopodioides.

THUYA Compacta, Vervaineana, George Peabody, Siberica, Crestata, Hoveyii, Globosa.
FERN-LEAVED BEECH—10 feet.
PURPLE BEECH—From 10 to 20 feet high, 2 to 3 inch caliber, with fine spreading heads and excellent roots.
ACER Colchicum Rubrum, Sugar, Red or Scarlet and Ash-Leaved Maples.
CATALPAS, ELMS, ASH, BEECH, Etc.
EXOCHORDA GRANDIFLORA, WHITE FRINGE, EUONYMUS; and a general assortment of hardy flowering shrubs; fine bushy plants for immediate effect.

EXOCHORDA GRANDIFLORA.

EXOCHORDA GRANDIFLORA.
(Electros of this Cut, $1.50 each.)

A hardy flowering shrub, native of the mountain districts of Northern China and Japan. It was introduced into this country several years ago, and has always been much admired and highly valued wherever known, but owing to its scarcity it has not been generally disseminated.

The plant is extremely hardy, enduring from 20 to 30 degrees below zero without the least injury; is vigorous and symmetrical in habit, forming a neat compact bush from 10 to 12 feet high in as many years; will endure shearing well, and can be trimmed into any desired shape; is not at all fastidious in its requirements, but grows freely in any good soil; and is a certain and profuse bloomer in the Fifth month, with the Lilacs, Haletia, Rhododendrons, etc. The flower in the left hand corner of the plate on next page shows the natural size.

The Exochorda bears some resemblance in size and appearance of flower to *Syringa Philadelphus* or Mock Orange, but the flower spikes are longer, lighter and borne on more slender branches, giving a particularly easy, graceful appearance to the bush; it is done blooming about two weeks before the Syringa commences and is of much better habit of growth.

It is unquestionably one of the choicest of our hardy flowering shrubs, and as soon as it becomes better known its merits cannot fail to be appreciated.

	Each.	Per Doz.	Per 100.
Light plants, 9 to 12 in., 1 yr. transplanted	$0 25	$2 00	$10 00
1 to 2 ft., transplanted	25	2 00	12 00
